

Digital Clinic™

Digital Clinic™ includes everything you need to transform your paper-based practice to a sophisticated, yet easy to use and affordable, digital system. This system will keep track of patients from check-in until check-out. It allows only your staff members to sign on to Digital Clinic and those with right privileges to access patient information, ensuring higher security and convenience. This system includes integrated laboratory, scheduling and billing systems.

This **HIPAA** compliant **EMR/EHR** system can be customized to your clinic's needs. Digital Clinic,™ coupled with our Smart Card technology, will automatically initiate a workflow to process the patient and update the status of the patient's appointment, thus saving the clinic much time.

"Tremendously relieves workload of my staff and mostly saved a lot of time. I can finish a medical record just by clicking while seeing a patient and not worry about having a load of charts backed up."
Dr. Y. Cho, M.D.

Benefits of Digital Clinic™

Both providers and patients can benefit from reduced overhead as a result of the administrative simplification and better quality of service provided by Digital Clinic™ that is traditionally handled manually.

- Will lessen time spent collecting, recording, documenting, and searching for patients' information
- Provides intuitive and easy to use interface
- Increases the quality of patient care as a result of the reduction of staff administrative tasks
- Will improve billing revenue by more accurately documenting each patient's encounter
- Is a cost-effective system with a high return on your investment (ROI)

Reasons to Examine Digital Clinic™

- Process Oriented, Ease of Use (**can be learned in an afternoon**)
- Versatile User Interfaces. Combination all/some of the following:
 1. Handwriting (Ink)
 2. Handwriting (Converted to text)
 3. Customizable Templates
 4. Voice Recognition capabilities
- The most comprehensive workflow-based Electronic Health Records Management System (EHR)
- Data exchange automation agent for automatic exchange of patient information with other systems
- Meets HIPAA compliance requirements
- Smart Card technology capabilities
- Practice Pattern Analysis (PAA)
- Affordable

Digital Clinic Value Proposition

- Reduce charting time by at least 3 hours/day
- Improve billing revenue by more accurately documenting each patient's encounter
- Provide better quality of patient care by reducing staff's administrative tasks
- Meet HIPAA security standards
- Easily staying compliant with government regulations through electronic records management

Increased Revenue

Assuming time savings of 3 Hrs/Day/PP and seeing additional 10 patients with an average of \$35 per visit

• Additional revenue per day	\$350
• Additional revenue per month	\$7,350
• Additional revenue per year	\$88,200

Important Points to Ponder

- CMS estimates that more than 30% of all coding is incorrect. The average physician's practice loses \$50,000 a year due to incorrect coding.
- 70% of non-provider expenses are costs for charting related issues.
- 50% - 70% of staff time is spent recording information or searching for (mostly misplaced) information.

Major Features of Digital Clinic™

- Access information from anywhere at anytime
- Allows you to work on your patient information offline.
- The most sophisticated yet easy-to-use scheduling system in industry
- Integrated billing system
- CMS-compliant; Superbills generation
- Built in workflow system to keep track of patients from the time patients check-in until check-out, staff, and facility
- Comprehensive Vital Signs analysis and plotting
- Automated Standing Order notification and management
- Encounters' Template designer for maximum flexibility and rapid charting
- Handwriting
- Imaging
- Lab Integration- directly interface with Piccolo™ and other Lab analyzers
- Advance Search and Population study
- Practice Pattern Analysis (PAA)
- Report Designer for easily creating custom reports
- Referrals Management
- Medical team collaboration via built-in messaging system
- Secure and confidential environment based on staff roles and privileges
- Configurable and customizable to meet staff's processes, profiles and preferences
- Standing Orders
- Voice Recognition
- Total mobility utilizing wireless and wired network
- Web browsing for research, e.g. drug interaction, from your mobile touch-screen device
- Prescriptions ordering from point-of-encounter
- Comprehensive database for patient information
- Data exchange automation to/from other systems
- Self-Service Check-in via smart card allows your patient to automatically check-in to Digital Clinic with a minimum amount of staff interventions or data entry
- Smart Login
- HL7 Integration
- Specialty EMR and much more
